## INDOOR PLANT HIRE

### October 2013 Newsletter

In our future Newsletters we would like to give you tips to help you understand how to bring plants into your projects.

You may not be aware, but we offer an obligation and cost free consultation service, "**Green Assist**" to help make sure that your next project involving plants comes together properly, on time, on budget and sustainably.

We can help with plant selection, planter sizing, Green Star and estimated cost.

**Contact Green Design** on 9410 0204 or email Rudy or Mark at [rursem@greendesign.com.au](mailto:rursem@greendesign.com.au) [mwilkins@greendesign.com.au](mailto:mwilkins@greendesign.com.au)

**Do you know** that often the air inside an office can be more polluted than in the street below with **VOC's** such as Benzene, Toluene, Formaldehyde etc.

The good news is, if office plants are in place, the worse the pollution is, the more VOC's are sucked up by the plants, boosting workplace productivity and the health of staff.

This is the main reason why the **Green Building Council of Australia** provides up to 2 Green Star points for providing plants in a fit-out.

This [report](#) on the subject was presented to Horticulture Australia by Professor Margaret Burchett of the University of Technology Sydney.
